Policy and Planning Services Department of Education Republic of Vanuatu

## Map of Vanuatu showing Location of Secondary Schools

## Acknowledgement

The Division of Policy and Planning Services in the Department of education wishes to thank all secondary school Principals and all those who assisted in collecting data for publishing this report.

Word of thanks is also extended to Mr. Enock Léon (School Radio Program officer) for informing through radio messages the secondary school principals on the islands about the returns of the questionnaire. The Statistics section relies very much on radio messages due to difficulty in communicating directly with schools.

Finally, the division of Policy and Planning Services wishes to thank the Director and staff of the division of Administrative and Financial services for assisting during the collection exercise. The secondary school data collection in this regard is crucial as it determines the financial grant from the government to schools, consequently it is paramount for teachers to prioritise data collection as it also assist in the annual budgeting of the Ministry of Education.

## Preface

It is my great pleasure to submit the 2002 Secondary School Annual Statistical Report. This report has been successfully published in collaboration with the principals and teachers. The school radio program by Mr. Enock Leon has played a significant role in this part.

The data compiled would provide to all users and public at large information on statistics of each secondary school. The data is compiled using tables and graphical illustrations and analysed to ensure easy access to users.

Intentionally, this report is produced to meet short and long term demands of all users particularly planners of government and non-governmental organizations, and specifically the Ministry of Education and students to name a few.

Thank you all again who helped in one way or another and I look forward to your cooperation in similar future exercises.

Division of poticy and planning services

## Introduction

The Secondary School Annual Report is intended to assist users in particular planners identify and make important decisions to serve different needs of secondary education. According to this report, there are 59 schools of which 29 are government owned, 19 mission schools and 11 private schools. The total enrolment has increased by 10 percent this year.

The objectives of this report are as follows:
$>$ To identify the need to increase the number of schools.
$>$ To determine annual enrolment rates
$>$ To assist economise the education system
$>$ To identify if there is sufficient qualified teachers
$>$ To assist identify teachers who needed in-service trainings
$>$ To identify different problems frequently arising in schools
$>$ To determine the distribution and rationalisation of schools
This report has three (3) main sections; School Information, Pupil's Information and Teacher's Information. The analysis of the report is based on data extracted from the questionnaires we received from each secondary school. As in previous years, collection of returns from schools still remains incomplete, 25 percent of mostly private schools have not submit their entry report forms. The school principals and the department staffs must be motivated so that we better plan the collection of returns in terms of time and resources mobilization. The integrity of data is affected by incomplete returns and needed consideration.

This year questionnaires were sent directly to schools as a way to combat part of the problems. However, certain schools reported not receiving the questionnaires as expected. It is certain that there is communication difficulty because the islands are spread over the sea.

It is important to reiterate that statistical data is the base of identifying and tracking school needs and in the long run determining development strategies.

## Section I: School Information

In this section, information on secondary schools is illustrated using tables and graphs:

Table 1: Number of Schools by Province and by Medium of Instruction

| Province | Anglophone <br> Schools | Francophone <br> Schools | Total |
| :--- | :---: | :---: | :---: |
| Torba | 1 | 0 | 1 |
| Sanma | 8 | 5 | 13 |
| Malampa | 5 | 5 | 10 |
| Penama | 7 | 2 | 9 |
| Sherfa | 12 | 5 | 17 |
| Tafea | 5 | 4 | 9 |
| Total | $\mathbf{3 8}$ | $\mathbf{2 1}$ | $\mathbf{5 9}$ |

The table above indicated that this year the total number of secondary schools increased from 57 to 59 , which is an increase by 3.5 percent. The provinces of Sanma and Shefa are the beneficiaries of the increase. Generally, there is a fare distribution of schools in Sanma and Torba with regards to their population. The table also indicates that 65 percent are Anglophone secondary schools in the 6 provinces.

## Graph 1: Secondary Schools by Medium of Instruction

The graph above justifies that there is no French secondary school in Torba. One major reason for not establishing a French JSS is because there are not enough feeder primary schools and also because class 6 enrolment is very low in existing French primary schools in Torba.

Tableau 1.1 : Number of Anglophone Schools by Administration

| Administration | Province |  |  |  |  |  | Total |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Torba | Sanma | Malampa | Penama | Shefa | Tafea | Anglophone | Francophone | Total (A+F) |
| Govt (E) | 1 | 3 | 5 | 4 | 5 | 3 | 21 |  | 21 |
| $\begin{aligned} & \text { Govt (F) } \\ & \text { (F) } \\ & \hline \end{aligned}$ | 0 | 2 | 2 | 0 | 2 | 2 |  | 8 | 8 |
| Catholic assisted (F) | 0 | 1 | 2 | 2 | 1 | 2 |  | 8 | 8 |
| Protestant assisted (F) | 0 | 2 | 1 | 0 | 0 | 0 |  | 3 | 3 |
| $\begin{array}{\|l} \hline \text { SDA } \\ \text { assisted (E) } \end{array}$ | 0 | 1 | 0 | 0 | 1 | 0 | 2 |  | 2 |
| Presbyterian assisted (E) | 0 | 0 | 0 | 0 | 1 | 0 | 1 |  | 1 |
| Anglican assisted (E) | 0 | 0 | 0 | 1 | 0 | 0 | 1 |  | 1 |
| $\begin{array}{\|l\|} \hline \text { C.O.C } \\ \text { assisted (E) } \\ \hline \end{array}$ | 0 | 0 | 0 | 1 | 0 | 0 | 1 |  | 1 |
| $\begin{array}{\|l} \hline \mathrm{AOG} \\ (\mathrm{E}) \\ \hline \end{array}$ | 0 | 0 | 0 | 0 | 0 | 1 | 1 |  | 1 |
| $\begin{array}{\|l} \hline \begin{array}{l} \text { Holiness } \\ (E) \end{array} \\ \hline \end{array}$ | 0 | 0 | 0 | 0 | 1 | 0 | 1 |  | 1 |
| Holiness | 0 | 0 | 0 | 0 | 1 | 0 |  | 1 | 1 |
| Total | 1 | 13 | 10 | 9 | 17 | 9 | 38 | 21 | 59 |

The above table shows the number of schools by type of administration. The government operates 29 schools, Catholic mission 8, Protestant 3 and SDA mission 2 schools. The following church denominations; Presbyterian, AOG, COC, Anglican and Holiness have on average 1 school each. Eighteen out of 21 junior secondary schools are complete stream from year 7 to 10. In the year 2003 it is possible to include year 11 classes in some secondary schools. Analytically 12 classes of year 11 will be needed to adequately cater for all out going year 10 students.

Graph 1.1: Disaggregation of Anglophone Schools by Administration

The above graph shows the distribution of Anglophone secondary schools by administration. The indicators show that the government has the majority of 54 percent of Anglophone secondary schools in the country followed by private administrations with 26 percent and other school authorities, which run 3 percent each of the school.

Graph 1.1.1 : Disaggregation of Francophone Schools by Administration

The pie chart above shows the general distribution of French secondary schools by type of administration. The government predominates the development of secondary education system followed by catholic mission with $40 \%$ followed by other church denominations.

Table 1.2: Rural secondary schools

| Islands | Torba | Sanma | Malampa | Penama | Shefa | Tafea | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |
| Ambae |  |  |  | 5 |  |  | 5 |
| Ambrym |  |  | 2 |  |  |  | 2 |
| Aore |  | 1 |  |  |  |  | 1 |
| Efate |  |  |  |  | 2 |  | 2 |
| Epi |  |  |  |  | 3 |  | 3 |
| Maewo |  |  |  | 1 |  |  | 1 |
| Malekula |  |  | 7 |  |  |  | 7 |
| Malo |  | 1 |  |  |  |  | 1 |
| Paama |  |  | 1 |  |  |  | 1 |
| Pentecost |  |  |  | 3 |  |  | 3 |
| Santo |  | 7 |  |  |  |  | 7 |
| Tanna |  |  |  |  |  | 9 | 9 |
| Tongoa |  |  |  |  | 1 |  | 1 |
| Vanualava | 1 |  |  |  |  |  | 1 |
| Total |  |  |  |  |  |  |  |

The table above shows the number of secondary schools by island excluding schools in the urban areas of Luganville and Port-Vila. There is no proper rationalisation of schools in terms of population density of each island. The Ministry should take into account the population density of each island before coming into term of establishing a new secondary school.

Table 1.3 : Schools in Port Vila and Luganville

|  |  |  |  |  |  | axemer |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Municipalities | Government | Catholic | Private (E) | Private (F) | Holliness (E) | Holliness (F) | Total Schools |
|  | Anglophone ${ }^{\text {F }}$ Francophone |  |  |  |  |  |  |

| Port-Vila | 2 | 1 | 1 | 4 | 1 | 1 | 1 | 11 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Luganville | 1 | 1 | 1 | 1 |  |  |  | 4 |
| Total 3 2 2 5 1 1 1 15 |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |

This table shows that 73 percent of secondary schools are located in Port Vila and 27 percent in Luganville. Administratively, the distribution is as follows:

- $54 \%$ of the schools are operating privately
- $33 \%$ are government own
- And $13 \%$ are catholic schools

The high population in the urban areas induce the high percentage of student enrolment in private schools. At the recent 1999 National population census, 49094 of the total population live in Port-Vila and Luganville.

Graph 1.3.1: Urban Secondary Schools

Table 1.4 : Number of classes by Provinces and by Year
(Year: 10, 11, 12, 13 and 14).

| Province | School levels |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Year 10 | Year 11 | Year 12 | Year 13 | Year 14 | Total |
| Torba | 1 | 0 | 0 | 0 | 0 | 1 |
| Sanma | 10 | 3 | 3 | 2 | 0 | 18 |
| Malampa | 9 | 3 | 1 | 0 | 0 | 13 |
| Penama | 7 | 2 | 2 | 1 | 0 | 12 |
| Shefa | 15 | 8 | 5 | 4 | 1 | 33 |
| Tafea | 8 | 3 | 1 | 0 | 0 | 12 |
| Total | 50 | 19 | 12 | 7 | 1 | 89 |

The table above shows the number of classes by year. There is clear evidence that enrolment decreases up the latter of senior secondary cycle.

- From year 10 to year 11 , it decreases by $62 \%$
- From year 11 to year 12 , it decreases by $14 \%$
- From year 12 to year 13 , it falls by $10 \%$
- From year 13 to year 14 , it decreases by $12 \%$

Graph 1.4.1: Enrolment trend by Year

The line graph indicates the decreases in senior secondary enrolment due to lack of available space in senior secondary schools. The Ministry must increase the number of classrooms in Senior Cycle according to the outcome of the student results especially after completing year 10, 11, 12, 13 and 14.

## Section II: Student Information

The information in this section is illustrated using tables and graphs:

Table 2.1: Number of Secondary school students by Province, 2002

| Province | Student 2002 |  |  |  | Student |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Male | Female | Total | 2001 | percentage $(\%)$ |
| Torba | 64 | 59 | 123 | 133 | -8 |
| Sanma | 1123 | 1029 | 2152 | 1819 | 18 |
| Malampa | 713 | 654 | 1367 | 1150 | 19 |
| Penama | 733 | 722 | 1455 | 1343 | 8 |
| Shefa | 1703 | 1774 | 3477 | 3319 | 5 |
| Tafea | 492 | 544 | 1036 | 982 | 5 |
| Total | 4828 | 4782 | 9610 | 8746 | 10 |

This year enrolment rose from 8,746 to 9,610 , which is a $10 \%$ increase on average. Below are specific percentage changes by province.
$>(-8 \%)$ unfortunately Torba indicates a decline from year 8, 9 and 10.
$>$ The enrolment in Sanma secondary schools increase by $18 \%$ due to the new establishment of year 7 at Saint Michel Technical School which admitted a total of 99 students in 2002.
$>$ Rensarie Junior Secondary School introduced two-year 11 classes and one year 12 class at Orap JSS which is administrated by the Protestant church. This increases enrolment by $19 \%$ in Malampa.
$>$ Penama province recorded an $8 \%$ increase due to the number of student in a new year 7 and the establishment of a new year 9 at Gambule Junior Secondary School.
$>$ There is a 5 percent increase in Shefa due to the introduction of year 8 in Central Secondary School, in Port-Quimie school on Epi and also in two other new schools, which were established in 2001.
$>$ Tafea province recorded a $5 \%$ increase due to a new year 11 at Tafea College and a new establish year 12 at Tafea Christian college and also due to the expansion of Lowanatom Technical school in 2001.

Graph 2.2: Student Percentage 2001-2002

Table 2.4: Number of Students by Medium of Instruction and by Province.

| Province | Student |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Anglophone |  | Francophone |  | Total |  |
|  | Male | Female | Male | Female | Male | Female |
| Torba | 64 | 59 | 0 | 0 | 64 | 59 |
| Sanma | 648 | 559 | 475 | 470 | 1123 | 1029 |
| Malampa | 325 | 318 | 388 | 336 | 713 | 654 |
| Penama | 625 | 615 | 108 | 107 | 733 | 722 |
| Shefa | 1021 | 1044 | 682 | 730 | 1703 | 1774 |
| Tafea | 282 | 268 | 210 | 276 | 492 | 544 |
|  | 2965 2863 1863 1919 |  |  |  | $4828$ | 4 |
| Total |  |  |  |  | 4782 |
|  |  | 5828 |  | 3782 |  |  | 9610 |

The above table shows the enrolment of secondary school students by medium of instruction. The total enrolment indicates that $60 \%$ of students enrolled in Anglophone secondary schools and $40 \%$ in francophone schools. The data by language of instruction illustrates the gap based on the number of students who enrolled in both Anglophone and francophone secondary schools in the country.

Graph 2.4: Student percentages by gender - Anglophone schools

The pie graph above indicates the number of students in Anglophone schools distributed by medium of instruction and by sex. The data collected shows that $51 \%$ are male and $49 \%$ are female students. The figures in table 2.4 also illustrate a near balance on the number of student by gender who enrolled in the Anglophone secondary schools.

Graph 2.5: Student percentages by gender - francophone schools.

The distribution of student in French schools by sex indicates that $49 \%$ are male students and $51 \%$ are female. The sharing of student in French medium schools by sex is vice versa to that of English secondary schools. In overall, however both graphs show that male students dominated the whole enrolment.

Table 2.5: Enrolment by Age and by Year level

| Age | Year 7 |  | Year 8 |  | Year9 |  | Year 10 |  | Year 11 |  | Year 12 |  | Year 13 |  | Year 14 |  | Total |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | M | F | M | F | M | F | M | F | M | F | M | F | M | F | M | F | M | F | T |

| 15 | 18 | 8 | 183 | 174 | 344 | 371 | 289 | 237 | 31 | 53 | 3 | 2 | 0 | 0 | 0 | 0 | 868 | 845 | 1713 |
| 16 | 2 | 1 | 28 | 20 | 158 | 151 | 308 | 335 | 119 | 151 | 27 | 29 | 0 | 0 | 0 | 0 | 642 | 687 | 1329 |
| 17 | 1 | 0 | 1 | 2 | 20 | 26 | 159 | 130 | 121 | 148 | 105 | 83 | 28 | 17 | 3 | 5 | 438 | 411 | 849 |
| 18 | 0 | 0 | 1 | 1 | 1 | 3 | 30 | 8 | 46 | 45 | 73 | 86 | 43 | 36 | 4 | 5 | 198 | 184 | 382 |
| 19 | 0 | 0 | 0 | 0 | 0 | 0 | 10 | 3 | 6 | 12 | 26 | 20 | 10 | 20 | 4 | 4 | 56 | 59 | 115 |
| 20 | 0 | 0 | 0 | 0 | 0 | 0 | 10 | 0 | 3 | 0 | 14 | 8 | 10 | 2 | 2 | 3 | 39 | 13 | 52 |
| Total | 1227 | 1169 | 1075 | 1083 | 955 | 988 | 890 | 812 | 329 | 410 | 248 | 228 | 91 | 75 | 13 | 17 | 4828 | 4782 | 9610 |

Age is one of the important criteria for selection into secondary education. The above table shows the actual number of students in secondary schools by age and by year level. According to the secondary education policy, the official age to enter secondary school is (12-19 years old). Out of the actual total enrolment, which is 9610 , only 9256 students have the required official age to be in a secondary school. The total number of student disseminated by age also indicated that $4 \%$ of them do not have the required age to enrol in any secondary school. It means that the student concerned have entered primary schools at their very young age.

The NER (net enrolment ratio) for the secondary education is $29 \%$ this year. The low net enrolment ratio denotes that the official secondary school age population currently attending school is very low.

## Graph 2.5 : Secondary Enrolment - Official and unofficial ages.

The pie chart above illustrates figures in table 2.5. In the case of Lycee LAB, the majority of year 14 students are 20 years of age. These students prepare themselves through the DAEU (Diplôme d'Accès a l'Enseignement Universitaire) to enable them to enter the French University in New Caledonia.

Table 2.6: Number of Student by School Administration

| Total | 3540 | 1959 | 116 | 399 | 461 | 265 | 300 | 363 | 188 | 682 | 68 | 79 | 69 | 627 | 3383 | 9610 |

The table above indicates the number of student by school administration. The data collected shows that 56 percent of the student attended government secondary schools followed by 12 percent in Catholic schools and 9 percent enrolled in Private schools. The rest of 23 percent of students enrolled in schools administered by other school authorities.

Graph 2.6: Percentage of Student by school administration.

Table 2.7: Student Enrolment in Urban Schools.

| Municipality | Sanma |  | Shefa |  | summary |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Anglophone | Francophone | Anglophone | rancophone | Anglophon | Francophone | Total |

| CHEMES |  | L |  | Case |  |  |  |

Despite of the actual total enrolment, $35 \%$ of students enrolled in urban schools. The schools enrolment distribution indicated that $10 \%$ of student enrolled in Luganville and $25 \%$ in Port Vila. Out of the total enrolment in the urban schools, $62 \%$ of the students are francophone and $38 \%$ are Anglophone. The last census recorded that $21 \%$ of the total population live in Port Vila. This highlights the concentration of population in the urban areas.

Graph 2.7: Percentage of Students in both Urban and Rural Schools

The Graph 2.7 shows that $65 \%$ of students enrolled in rural schools while 35 percent in urban schools ( $10 \%$ of students enrolled in Luganville and $25 \%$ in Port Vila).

Table 2.8: Enrolment Trend from 1992 to 2002

| Province | 1992 |  |  | 1993 |  |  | 1994 |  |  | 1995 |  |  | 1996 |  |  |

| 297 | 225 | 522 | 289 | 252 | 541 | 381 | 345 | 726 | 448 | 415 | 863 | 486 | 496 | 982 | 492 | 544 | 1036 |
| 3297 | 2862 | 6159 | 3457 | 3210 | 6667 | 3986 | 3712 | 7698 | 4364 | 4118 | 8482 | 4487 | 4314 | 8801 | 4828 | 4782 | 9610 |

Table 2.8 indicates that the average rate of increase of student enrolment from 1992 to 2002 is $11 \%$. In 1993 there was a sudden increase with the intake of year 7 students as a result of increases in the number of secondary schools.

Graph 2.8: Student Growth 1992-2002

With the current enrolment trend, it is projected that the number of students will doubled in 11 years if enrolment continue to increase by 11 percent. This means that the government on its part has to make available more schooling space each year.

Table 2.9: Total number of repeaters by province

| Province | Year 7 | Year 8 | Year 9 | Year 10 | Year 11 | Year 12 | Year 13 | Year 14 | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Torba | $\mathbf{1}$ | 2 | 1 | 0 | 0 | 0 | 0 | 0 | 4 |
| Sanma | 12 | 17 | 6 | 18 | 7 | 0 | 1 | 0 | 61 |
| Malampa | 18 | 19 | 17 | 17 | 3 | 5 | 0 | 0 | 79 |
| Penama | 1 | 2 | 1 | 4 | 0 | 0 | 0 | 0 | 8 |
| Shefa | 21 | 12 | 0 | 8 | 5 | 15 | 1 | 0 | 62 |
| Tafea | 3 | 1 | 0 | 1 | 0 | 0 | 0 | 0 | 5 |
| Total | 56 | 53 | $\mathbf{2 5}$ | $\mathbf{4 8}$ | $\mathbf{1 5}$ | $\mathbf{2 0}$ | $\mathbf{2}$ | $\mathbf{0}$ | $\mathbf{2 1 9}$ |

Within this year's total enrolment; about 2 percent of the enrolments are repeaters. This shows that there is continual increase in the total number of repeaters in year 7, 8 and year 10 annually. The reason there are repeaters in secondary level is when under age students do not perform well, they could repeat by the discretion of the principal or school council. Other students repeat on medical or other unavoidable circumstances.

Table 2.10: Total number of dropouts in 2001

| Province | Year 7 | Year 8 | Year 9 | Year 10 | Year 11 | Year 12 | Year 13 | Year 14 | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Torba | 0 | 4 | 0 | 0 | 0 | 0 | 0 | 0 | 4 |
| Sanma | 23 | 19 | 23 | 41 | 2 | 37 | 2 | 0 | 147 |
| Malampa | 19 | 34 | 14 | 17 | 2 | 0 | 0 | 0 | 86 |
| Penama | 6 | 15 | 20 | 14 | 2 | 3 | 3 | 0 | 63 |
| Shefa | 20 | 11 | 13 | 18 | 6 | 4 | 0 | 0 | 72 |
| Tafea | 15 | 25 | 18 | 11 | 0 | 0 | 0 | 0 | 69 |
| Total | 83 | 108 | 88 | 101 | 12 | 44 | 5 | 0 | 441 |

The above table shows that there is 5 percent of dropouts from the 2001 total enrolment in secondary schools. The main reason is because some parents were not able to finance their child's school fees; therefore the students were not able to complete the scholastic year. Other reasons include termination from school due to serious misconduct or poor academic performance. It is important to note that some schools tend to include year 10 dropouts at the end of the year, which may affect this data. The table above shows that there is a high number of dropouts in year 8 and year 10 .

Table 2.11: Total number of Transfers in, 2002.

| Province | Year 7 | Year 8 | Year 9 | Year 10 | Year 11 | Year 12 | Year 13 | Year 14 | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Torba | 0 | 0 | 0 | 0 | 1 | 0 | 0 | 0 | 1 |
| Sanma | 153 | 70 | 55 | 52 | 28 | 6 | 6 | 0 | 370 |
| Malampa | 94 | 46 | 28 | 10 | 44 | 0 | 0 | 0 | 222 |
| Penama | 55 | 17 | 19 | 13 | 0 | 2 | 0 | 0 | 106 |
| Shefa | 87 | 23 | 26 | 6 | 21 | 9 | 0 | 0 | 172 |
| Tafea | 20 | 10 | 9 | 7 | 0 | 0 | 0 | 0 | 46 |
| Total | 409 | 166 | 137 | $\mathbf{8 8}$ | $\mathbf{9 4}$ | $\mathbf{1 7}$ | $\mathbf{6}$ | 0 | $\mathbf{9 1 7}$ |

The transfer process of students from one school to another usually takes place through out the year. This year indicators show that 10 percent of the students were transferred from one school to another within the secondary level. However we are not able to identify the reasons of these transfers. But it is believed that most of these transfers took place because some parents find it difficult to finance both school fees and transportation cost. Therefore parents decided to enrol their child/children in a nearby secondary school that are financially affordable.

Table 2.12: Total number of Transfers out, 2002

| Province | Year 7 | Year 8 | Year 9 | Year 10 | Year 11 | Year 12 | Year 13 | Year 14 | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Torba | 0 | 0 | 1 | 0 | 0 | 0 | 0 | 0 | 1 |
| Sanma | 17 | 14 | 9 | 30 | 8 | 8 | 13 | 0 | 99 |
| Malampa | 35 | 23 | 9 | 14 | 16 | 20 | 0 | 0 | 117 |
| Penama | 8 | 6 | 5 | 0 | 0 | 0 | 0 | 0 | 19 |
| Shefa | 14 | 35 | 19 | 19 | 7 | 7 | 0 | 0 | 101 |
| Tafea | 11 | 3 | 3 | 0 | 0 | 0 | 0 | 0 | 17 |
| Total | 85 | 81 | 46 | 63 | 31 | 35 | 13 | 0 | 354 |

Table 2.12 shows that 4 percent of students were transferred out justifying more students coming in than going out of the secondary education system. The reasons for transfer out are similar to transfer in. There is evidence that most students attend schools in their province or selected to schools of their preference resulting in very low out-transfers.

Table 2.13: Total number of Boarders in Secondary schools

| Province | Year 7 | Year 8 | Year 9 | Year 10 | Year 11 | Year 12 | Year 13 | Year 14 | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Torba | 37 | 33 | 21 | 21 | 0 | 0 | 0 | 0 | 112 |
| Sanma | 378 | 332 | 293 | 240 | 147 | 107 | 42 | 0 | 1539 |
| Malampa | 333 | 321 | 227 | 195 | 107 | 21 | 0 | 0 | 1204 |
| Penama | 345 | 295 | 304 | 257 | 78 | 63 | 19 | 0 | 1361 |
| Shefa | 334 | 265 | 238 | 277 | 131 | 119 | 41 | 0 | 1405 |
| Tafea | 264 | 231 | 231 | 204 | 60 | 3 | 0 | 0 | 993 |
| Total | 1691 | 1477 | 1314 | 1194 | 523 | 313 | 102 | 0 | $\mathbf{6 6 1 4}$ |

The above table shows that 69 percent of the total secondary enrolments are borders. Most parents prefer to board their kids so that they could be better discipline academically or learn to be independent when they become older. Other reasons for high rate of boarding is most students' travel from their home island to another island to attend secondary school.

## Section III: Teachers Information

In this section, teachers information are tabulated and illustrated using graphs:
This year the total number of secondary school teachers is 591 . The majority of the teachers are graduates with teaching qualifications from the Vanuatu Institute of Teacher education (VITE) or from the other universities.

Table 3.1: Teacher's by Province and by Sex.

| Province | Male | Female | Total |
| :--- | :---: | :---: | :---: |
| Torba | 5 | 1 | 6 |
| Sanma | 105 | 49 | 154 |
| Malampa | 53 | 24 | 77 |
| Penama | 61 | 22 | 83 |
| Shefa | 115 | 91 | 206 |
| Tafea | 39 | 26 | 65 |
| Total | 378 | 213 | 591 |

The number of secondary school teachers has increased by $6 \%$ this year base on 2001 statistics. The 2002 indicators show that $61 \%$ of teachers are posted to Shefa and Sanma secondary schools. This is again due to the larger number of secondary schools in these two provinces.

Table 3.2: Percentage of Teachers with Teaching Qualification.

|  | Trained Teachers |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Province | Male | Female | Total Trained Tea | Total Teachers | $\begin{gathered} \hline \% \\ \text { Teachers } \end{gathered}$ |
| Torba | 3 | 0 | 3 | 6 | 50 |
| Sanma | 68 | 35 | 103 | 154 | 67 |
| Malampa | 38 | 21 | 59 | 77 | 77 |
| Penama | 49 | 19 | 68 | 83 | 82 |
| Shefa | 75 | 69 | 144 | 206 | 70 |
| Tafea | 24 | 12 | 36 | 65 | 55 |
| Total | 257 | 156 | 413 | 591 | 70 |

The above table shows that $70 \%$ of teachers have obtained a teaching certificate. It must be noted however that $30 \%$ of the teachers do not obtain a teaching certificate. It is important that the department of Education trained them for the benefit of our education system and to address issues of the level of training for teachers who teach in secondary schools.

Table 3.3: Student/Teacher Ratio

| Province | Number of <br> Student | Number of <br> Teachers | Student/ Teacher <br> ratio |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Torba | 123 | 6 | 21 |  |  |
| Sanma | 2152 | 154 | 14 |  |  |
| Malampa | 1367 | 77 | 18 |  |  |
| Penama | 1455 | 83 | 18 |  |  |
| Shefa | 3477 | 206 | 17 |  |  |
| Tafea | 1036 | 65 | 16 |  |  |
| Total | 9610 | 591 |  |  |  |

The above table indicated that the average student/teacher ratio is $17: 1$. According to the secondary education teacher posting policy, the official posting ratio is $35: 1$. The total number of teachers shows that the actual average student/teacher ratio is fairly low. While it is important for the department of education to review teachers posting, one major reason for the under average actual ratio is the geographical location of schools.

Table 3.4: Teachers Status

| Province | Permanent | Probation | Voluntary | Total |
| :--- | :---: | :---: | :---: | :---: |
| Torba | 4 | 1 | 1 | 6 |
| Sanma | 119 | 24 | 11 | 154 |
| Malampa | 35 | 20 | 22 | 77 |
| Penama | 54 | 11 | 18 | 83 |
| Shefa | 148 | 32 | 26 | 206 |
| Tafea | 29 | 26 | 10 | 65 |
| Total | 389 | 114 | 88 | 591 |

The above figures are distribution of teachers by their teaching status:

- $66 \%$ of teachers are permanent. These teachers are full time teachers with teaching certificates.
- $19 \%$ are probation teachers. These are new graduated teachers.
- $15 \%$ are voluntary teachers. They are normally paid by the school's administration or by other nongovernment organizations. The government must coordinate teacher's recruitment properly to avoid disparity of teacher's qualification, which may affect the student's performance.

Table 3.5: Number of Teachers paid under Different School's Administration.

| Province | Government | Mission | School Council | Others |
| :--- | :---: | :---: | :---: | :---: |
| Torba | 5 | 0 | 0 | 1 |
| Sanma | 97 | 22 | 7 | 28 |
| Malampa | 59 | 8 | 2 | 8 |
| Penama | 68 | 7 | 2 | 6 |
| Shefa | 132 | 29 | 9 | 36 |
| Tafea | 48 | 7 | 5 | 5 |
| Total | 409 | 73 | 25 | 84 |

The above table indicates the different types of school administrations who also recruit and pay teachers' salaries.

- $69 \%$ mass of salaries is paid by the government
- $12 \%$ of teacher's salaries is paid by different churches
- $4 \%$ salaries are paid by the school council
- $15 \%$ of teacher's salaries are paid by other school administration.

The churches contributed a lot financially in paying for their teacher's salaries. We noted however, that there also financial difficulties in paying teachers salaries by both government, church and private. The government must look seriously again at different scales it is currently paying its teachers.

## Conclusion:

The following are key points and issues highlighted in the 2002 secondary schools statistical digest which importantly the Ministry of Education, the churches and private must be made aware of in education development;
$>$ The distribution of schools in relation to actual population needs of each in each island is irrational.
$>$ The fair establishment of Anglophone and Francophone schools in each province.
$>$ The establishment of a Francophone secondary school in Torba province must be considered.
$>$ The inadequacy of the number of year 11 classes to cater for high year 10 dropouts.
$>$ The high number of urban schools still does not match the fast urban population growth.
$>$ The lack of official entry age policy enforcement in secondary schools.
$>$ The high rate of secondary schools dropouts in year 10, 11, 12, 13 and 14.
$>$ The number of untrained teachers in the teaching force
$>$ The actual student teacher ratio is generally low despite that some schools are short of teachers.

## Recommendations:

Here is some recommendations base on the analysis of this data:
$>$ To ensure that there is a balance grouping of students by schools, by islands and by provinces.
$>$ To reduce disparity between the number of Anglophone and francophone students proportionally.
$>$ The government should encourage other organizations or individuals to establish more schools.
$>$ More than $60 \%$ of students were not able to continue their studies in year 11. The government should put in place other means of training as operating more new technical schools. There could be serious poor education related problems in future if the situation is not carefully addressed.
$>$ To harmonize the teacher training: permanents, probation and voluntary to have the same quality of training in each school.
$>$ To respect the official criteria concerning the number of students per class and per teacher. (The average students/teacher ratio is 17:1) The ministry must:

- Ensure proper number of students per classroom to avoid congestion and conductive learning environment.
- Review teachers posting
- Review teacher's salary payment

## Secondary School Teachers

## Statistical Questionnaire

## STATISTICS QUESTIONNAIRE PRIMARY EDUCATION YEAR 2002

## I. IMPORTANT NOTE

Policy and Planning Services is sending you three copies of 2002 statistical questionnaires which 2 copies must be completed and returned to Your Provincial Education Office before $\mathbf{3 0}^{\text {th }}$ May 2002, one copy must be kept by the school for reference. To avoid inaccurate data or not adhering to time set which may lead to disciplinary action teachers filling the forms are advised to ensure data is accurate and handed in on time.

If you have any queries concerning the questionnaire, please contact Ms Fabiola Bibi by Telephone: 22 309, Fax 22849 or your Provincial Education Officer.

## II. GENERAL INFORMATION:

1. Name of School:

Island:
Province:

Establishment Year: $\qquad$
(New schools only)
2. Medium of Instruction:

English: $\square$ French: $\square$ please tick in the boxes
3. Affiliation/ Administration (tick)

| Government | $\square$ |
| :--- | ---: |
| Catholic | $\square$ |
| Protestant | $\square$ |
| SDA | $\square$ |
| Presbyterian | $\square$ |

Other specify --------------------------------------
Private $\square$
School Committee:
Yes No "Please circle"

## III. ENROLMENT:
